

1

Rules of engagement ab initio had contained prior submission under the matter by legislation the Legitimacy, for in substance collected

by cognition and knowledge, from historical involvements in conflict and its closure, the founding of conventions results in consensus subscribed to by all, that even before exposition is evident reached understanding, for instance, that basis per future conflicts en masse as Declaration of War was requisite, here amiss.

By volume of violence wrought against men, women, children, and too architecture, infrastructure, economy, nature, luxuries, art, literature, et cetera, were mortal doubt to challenge exercise against the unanswerable what irrational by all Goods in our societies, then the requisite Question be asked to regard what basis to oppose such destruction shall resolution be Just?

2.

As per future impossibility for societies' make of civilizations to post whatever to abyss bygone destruction, in this termed impossible, what service does discern the manifolded not to be unjustly injured, cancelled, nor eliminated;

yet war remains on the horizon: by means of collapsed plot invisible what Requested but details in flawed temperaments and factors of those and then what active plausible responses so to collect ourselves and stand guard for all our civilizations; but by discernment if declaration remains unfounded if not yet called or even later uttered, what retains that accountability through the eras of history that is in time.

3.

If that coherence for vast volume of violence and destruction be doubted, in action even if fragments and bits could recall to recollection for some parts of some rationale should for What Response to interpretation of What Question presupposed with that told by who and what unnecessarily injured or broken, yet with so variously in means by crafts and so enormously scaled in masse by numbers,

4.

that we who are involved in participation at the inter-nations must motion towards Eventual Peace, how but to forward resolution so for each our nations to be free of unnamed conflicts and independent from undeclared attacks -

irrational violence where lacking justification is to be found obstruction such as by distress of expenditures that raised from level of conflict to whatever stage of war;

with the Intent for closure of injurious events so to go for close as for conclusion for times in peace.

5.

For engagement first finds fair domain by legal jurisdiction of administered conflict in arms:

for example, quantified numbers in capacity on each side so for each battle bounded finitely in numbers engaged, with each conflict understood by all sides to be accountable, to delimit whatever emerged in destruction and too for closure to stay possible on projected schedules.

As in any art of war,

Civility presupposes any projection or forecast in civil engagement: even with remaining conflict is due no loss of confidence in civility intrinsic to the presentation of nations, diplomatic tabling of differences to elicit conversation for resolution, from efforts ongoing in resolution towards peace,

but endeavor towards no loss in historical culture nor too high a toll of lives from irrational or unaccountable events emergent from conflict: for together in consensus for the retainment of all civilized make.

6.

Yet what tell over this span was meant is the Question in part.

7.

By rules of engagement and conventions of civilized conflict, where without is havoc, whose chaos' outcome were poverty everywhere,

Yet,

of arts and culture, but the treasures of civilization to be kept by each world's own;
of architecture, infrastructure, economy, are structures underpinning societal motions' activities which to be guarded;

of careful delicate nature, whether of biological vegetable or animal, or cosmic continuum of time and space and bodies, but that each should stay intact except where met with careful managed utilization;

of products of industry, in their variety and quality by goods and services customized to best fit the purchase by clientele to be saved;

while accounts against such of yet known liabilities
and to be determined losses

8.

had been offset, displaced by events in recounting constituted
battle against the civilian and peaceful lot wherein the blood of even innocents were spilled,

the responsive Question is Why?

9.

Against whom had these battles been wrought: few on this side of peace were wont to raise the stakes but did ask Why. Some did find reason to speculate were overdue agitation, dispute, or injustice occurred that raised such maligned war-like postures

however found as often the perfection of the worlds strived for was never yet reached, but to this we had tried as individuals, as groups, and as communities.

10.

Conflict seeks rational closure from that peace dawns upon the minds of many who elect to stay whatever disrupted their principle or order, for time sufficiency to de-escalate violence:

when given reason legally found

to draw notioned lines towards a plan post to declare the cause or factors demanded for change,

then such resolution to the happiness of all

will reach all's sight.

11.

Great actions and discoveries transpired and await for that in our midst
What actions of Which many veins achieved What fruition to knowledge of the possible Tomorrows, which
must be let thru the complex of Intention and Foresight by Design to certain particular Outcomes Wished For

be set as Objectives...

Then voiding violence neither emerged nor erupted
Brave Adherence to the Willful Designs forged,

guaranteeing that success of the Will of Inter-Nations for future peace and prosperity in potential and eventual actuality
shall overcome measeley objections from whatever not in reason found.

12.

In that cooperation for enumerated objectives under Peace, amended over conventions' discourse for accounts, means,
and goals Various are members to find fortitude from stated understanding and vital undertaking, which process and
accomplishment beget our coveted Deeds,

whose act is to position each of us upon the Ratio of the World
and call for the Resolution in Outcome Eventual

– how but in prayers' faith, before the Muses,

let what be posited, when fate with effort place
each above that substance in situ originally dwelled:
to elicit intelligibility wherein the proportions in poorer affairs, and
from our laws and histories herein the metrics
to See then Let the Motions that surmount brutishness were ill logic,

13.

to the elevation of True Dignity, Human Trust, the Nobility of Society

which by the knowledge matter resolution is alert to respond to
but not escalate conflict.

An instance, if land were the question, how then
resolved but plan to be drafted over the picture of whatever were?

So to uplift what people and works and even delimited battles,

so for triumph in peace eventual Shall Arrive.

14.

The bright idea is aloft where but above us of happiness and peace
sought sown in any populace's World if ordered could find such seeds
of notions, to uplift our gaze upon that like Justice and that like Liberty and that like Peace, these forms of ideas then
favored by some, many, or all:

15.

If ordered, the World holding all in each for beholding could hold each world
in order ie. many order each one for each own world within its borders ~

16.

Such true, why the Question brought to fore by these chaos recent
but “error in some matters”
for Determination by the inter-Nations, in this is another part of the Question.

What went wrong must have pressed against one or some or many worlds but adjudication
with the determination in legality remains amiss so such fact for knowing
by the Inter-Nation is to be forged in response to this part of the Question.
